Oaklands Green

City of Burlington

Westbury International retained van der Woerd Assoc. to plan, engineer and survey the development of high density luxury apartments located in an established neighbourhood in Aldershot.

Oaklands Green is a 216 unit 4 storey condominium project located in a prestigious area of Burlington developed by Roseland Green Inc.

A high density development with underground parking in an existing neighbourhood provided logistical challenges for construction. The outcome was an upscale condominium project with plenty of greenspace and amenities.

Services Performed:

- Feasibility Study
- Engineering Design and approvals for Watermains, Sanitary Sewers, Storm Drainage
- Road Construction and Earthworks.
- Logistical Construction Advice
- Contract Preparation, Tender and Administration
- Construction Inspection and Layout Survey

Location:

South Side of Plains Road West from Daryl Drive to Boothman Avenue, Burlington

Client

Roseland Green Inc.
