& Associates Ltd.
Consulting Engineers

Roseland Green

City of Burlington

Roseland Green Inc. retained van der Woerd Assoc. to plan, engineer and survey this 12 acre infill development property located in an established neighbourhood.

This 145 unit townhouse project located in a prestigious area of Burlington required existing infrastructure to be reconstructed to accommodate its demands. The logistics of this large infill project and the challenges of constructing within an existing neighbourhood were successfully resolved.

Services Performed:

- Topographic Survey
- Feasibility Study
- Stormwater Drainage Design
- Engineering Design of Watermains, Sanitary Sewers and Storm Drainage
- Road and Earthworks Design
- Contract Preparation, Tender and Administration
- Construction Inspection and Layout Survey

Location:

South Side of Plains Road West from Daryl Drive to Boothman Avenue, Burlington

Client

Roseland Green Inc.
